

## Brainstorming & Idea Prioritization Template

|                      |                                         |
|----------------------|-----------------------------------------|
| <b>Date</b>          | 18 July 2026                            |
| <b>Team ID</b>       | SWTID-2026-5023                         |
| <b>Project Name</b>  | Rising Waters (Flood Prediction System) |
| <b>Maximum Marks</b> | 3 Marks                                 |

### Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

| S.No | Team Member       | Idea / Suggestion                              | Category            | Group No. |
|------|-------------------|------------------------------------------------|---------------------|-----------|
| 1    | Bhavana Thotakura | Flood Prediction System using Machine Learning | AI/ML               | 1         |
| 2    | Bhavana Thotakura | Rainfall Forecast System                       | Weather             | 1         |
| 3    | Bhavana Thotakura | Landslide Prediction System                    | Disaster Management | 1         |
| 4    | Bhavana Thotakura | Water Quality Monitoring                       | IoT                 | 1         |
| 5    | Bhavana Thotakura | Flood Alert Mobile Application                 | Disaster Management | 1         |

### Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

| Gro up No. | Final Idea                                     | Feasibility (High/Medium/Low) | Importance (High/Medium/Low) | Priority | Selected (Yes/No) |
|------------|------------------------------------------------|-------------------------------|------------------------------|----------|-------------------|
| 1          | Flood Prediction System using Machine Learning | High                          | High                         | 1        | Yes               |
| 2          | Rainfall Forecast System                       | Medium                        | Medium                       | 2        | No                |
| 3          | Landslide Prediction System                    | Medium                        | High                         | 3        | No                |
